

FOR IMMEDIATE RELEASE

**BluePrint Data adds Nine Languages to its Web Site Reviews
for its Internet Filtering Services**

JACKSONVILLE, FLORIDA USA – Friday January 30, 2009 – BluePrint Data today announced the addition of nine new Language Web site reviews to its URL review system. Currently BluePrint Data reviews English, Spanish, Japanese, and Chinese language Web sites in full with limited reviews of all other languages. BluePrint Data completes human reviews of Web sites and categorizes and classifies the information within the web sites to its URL Review database. BluePrint Data will be adding Arabic, Dutch, French, German, Italian, Korean, Polish, Portuguese, and Russian languages to the full Web site review process.

BluePrint Data provides its URL filter and content filtering database and technology and services to Internet Security vendors and companies. This includes Unified Threat Management (UTM), Managed Security Service Providers (MSSP) and Software as a Service (SaaS). We also provide Internet Filtering solutions and services to Information Technology Solutions Providers and Value Added Resellers (VARs) as well as Telecom and Carriers. BluePrint Data has the world's largest 100% human reviewed URL Filter Database with web site domain reviews covering over 800 million web pages.

"The addition of Additional Language Web site reviews is valuable service to our existing partners and customers and we look forward to offering it to future customers and partners" said Bob Dahlstrom, BluePrint Data's CEO. "We strongly believe this can help make the Internet safer and it offers a new value add to our Internet security products and services".

About BluePrint Data.
