BluePrint Data

Architecting a Safer Internet

# BluePrint Data Celebrates Safer Internet Day with Kidsnet Internet Parental Controls and Security

BluePrint Data is developing Kidsnet, an Internet Filtering app that locks children into a safe "walled garden".

FOR IMMEDIATE RELEASE

JACKSONVILLE, Fla. – February 9, 2021 – **BluePrint Data**, the leader in high quality, OEM, integrable Internet Security is proud to support Safer Internet Day and better internet for kids with its *Kidsnet*® computer software product. Kidsnet locks your kids into a "walled garden" of websites that have been reviewed and marked as safe by human reviewers (not bots, AI, or automated technology). In addition, Kidsnet has all the security features that businesses use to protect networks from all kind of outsider intrusions, viruses, hacks, and ransomware making it an integrated solution for all cyber security needs.

*Kidsnet acts as a protective shield between your kid's computer
and the threats from the cyber world*

Kidsnet, expected for a release this summer, is a premier parental control and Internet security solution that enables children to benefit from online content, applications, and tools without exposure to web-borne malware and viruses, social network or media distractions, or inappropriate web content. Kidsnet is compliant with several educational standards including the United States Children's Internet Protection Act (CIPA).

Kidsnet uses the BluePrint Data human reviewed website database, the world's largest list of 100% human reviewed and categorized websites, covering 99% of the active web. By locking Kidsnet users into only websites that professional web site reviewers have designated as safe we assure, they are safe and protected. Adding to the security are the integrated tools to eliminate web-borne malware, viruses, and malicious content.

**The Most Trusted Website Content Authority in the World**
BluePrint Data (and by extension BluePrint Data India) specializes in providing high quality
Website / URL Filtering, which makes them the most trusted Website content authority in the
world. In fact, other Internet Filtering companies' contract with BluePrint Data to complete web
site / URL content reviews to improve their filter databases or when their automated technology
can't determine a website or URLs content.

**About BluePrint Data**

BluePrint Data, establishes in 1998, provides its URL / Web site content filters, technology, and
security products and services to Internet Security vendors such as Unified Threat Management
(UTM), Managed Service Providers (MSP), Managed Security Service Providers (MSSP) and
Software as a Service (SaaS) providers as well as providing private label / OEM services to
Value Added Resellers (VARs), Information Technology Providers, Anti-Virus and Anti-Spam
service providers, Independent Software Vendors (ISVs), and telecom, carriers, and ISPs and
other companies. BluePrint Data has the world's largest 100% human reviewed URL Filter
Database that is combined with tools and services to provide easy integration of the BluePrint
Data OEM URL Filter database. For more information, visit www.blueprintdata.com or follow
the company on Twitter @blueprintdata
