BluePrint Data Cloud Based Internet Security

Expand Your Cloud Offering & Ensure Your Customer Success

Who is BluePrint Data?

BluePrint Data is a global leader in OEM / MSP/MSSP Website / URL Content Filtering technologies and services offering the **Only Zero False Positive Guarantee** available. BluePrint Data's technology and service is being used by leading solution providers around the world with over 90% of our products and services provided as private label or white label offerings.

What is URL Content Filtering?

URL Content Filtering is widely used to filter web access by organizations of all sizes to block or allow websites based on it's content as opposed to blocking specific domains. With millions and millions of websites on the internet, organizations leveraging URL Content Filtering ensure their employees have access to websites they need without access to inappropriate websites. Blueprint Data's uses trained people to review website content, not Bots or automated technologies, which enables BluePrint Data to ensure the most accurate service available.

Internet Content Filtering Partnership

Why Should I Partner With BluePrint Data?

Managed Service Providers (MSP) and Managed Security Service Providers (MSSP) akin to Original Equipment Manufacturers (OEM) have leveraged BluePrint Data's services to ensure their customers' content filtering needs are met while cashing in on the opportunity to augment revenue.

"With little to no IT overhead, MSPs and MSSPs can start providing BluePrint Data URL Content Filtering as a standard offering bundled with Hosted Desktop solutions"

Increase revenue with Blue-Print Data URL Content Filtering as a standard bundled offering or as a White Label Offering that can be an add-on.

Either way, we are here to support you and help you create an exciting and profitable offer to ensure your success! With SLAs designed to help you increase revenue without overheads or additional resource requirements.

What Sets BluePrint Data Apart?

BluePrint Data's high evaluation standards make us the most trusted Website content authority in the world. The BluePrint Data Website / URL Content Filtering technologies provides content and context details on top level domains, sub-domains and within domain areas in **63 Languages**.

Our approach is close to 100% accurate as we use a minimum of two human reviewers

Thus, unlike automated technologies that are prone to error rates we are almost error free.

How Does the Partnership Work?

BluePrint Data's MSP / MSSP Partner Programs are designed to be flexible to meet you and your customer needs. Partnering with BluePrint Data is easy. As an established OEM provider we are not in competition with you, we are your partner. Backed by a team that insists on value ahead of price and satisfaction ahead of revenue - Blueprint Data will help determine the best arrangement.
